Power BI Training

Fundamentals, Advanced and Mentoring

Power BI Training

with Flock Consulting

Flock delivers hands on developer led training teaching skills and design fundamentals required to create truly powerful reporting. Training options for Beginner, Intermediate and Advanced users with Mentored training also available.

Ready to embark on this empowering journey? Contact us today to learn more about our Power BI training course and how it can benefit your organisation.

Let's make your data fly!

I found the training incredibly insightful and am now excited to introduce Power BI as a tool in my daily work. All attendees from our team will have benefited greatly from taking part in these sessions. Thanks Amanda!
Mitch Turner - Management Accountant - Firstlight

Consultant-led training

Our New Zealand based trainers are experienced BI consultants with extensive real-world expertise, driven by a passion for imparting their skills and knowledge.

A passion for best practice

Not only do we teach the technical components of the tool, we also show the best practices for design and deployment.

Remote or on-site delivery

We can deliver workshops in person or remotely with the same result.

Fundamentals

Load and Visualise data

Attendees learn the fundamentals of developing a Power BI report, best-practice design and development. The workshop is extremely practical and is focused on giving attendees the best training to deliver successful data visualisation projects after the training.

Workshop outline

- Connect, import, and transform data from a variety of sources.
- Defining business rules, KPIs and actionable insights.
- Explore and transform your data.
- Build data visualisations using a best-practice approach.

Remote Delivery

- Two 3-hour sessions delivered online

Investment

- $2,900 NZD for up to 4 attendees

Advanced
Data Visualisations

This builds on the Fundamentals course introducing developers to advanced concepts of data visualisation and storytelling.

Workshop outline

- Storytelling with data leading to actionable insights.
- The agile process for creating Power BI data visualisations.
- The art behind visualistions
- The implications of choosing the right charts
- Gain famililarity of Power BI custom visuals.

Remote Delivery

- One 3-hour sessions delivered online

Investment

- $1,450 NZD for up to 4 attendees

Advanced

Data Modelling

This course introduces attendees to the concepts of advanced data modelling, importing data from multiplesources, M language and the advanced editor.

Workshop outline

- The Power BI Desktop data model, its components, and most effective schemas.
- Understanding the Power Query M language.
- Import data from a variety of sources.
- Create queries using toolbar navigation and advanced editor parameters.
- Organise queries using folders.

Remote Delivery

- One 3-hour sessions delivered online

Investment

- $1,450 NZD for up to 4 attendees

Mentored Learning

Mentored learning is an effective way for trainees to continue to embed their skills in Power BI using data they are familiar with. Personalised sessions with one on one training based on requirements of the trainee delivered remotely.

Workshop outline

- Learn and embed skills while you build a live report for your organisation.

Remote Delivery

- Self paced and self-directed

Investment

- $250 p/hour
